

Att'y Ref. No. 003-113

U.S. App. No.: 10/775,140

ABSTRACT OF THE DISCLOSURE

An extraction tool (20) for extracting spiral threaded inserts ~~comprises~~ includes an elongated basic body (23,...,26), on the one end of which an extracting tip (28) narrowing toward the front and intended for being inserted with a cutting action into the threaded insert to be extracted is provided, and on the other end of which ~~means a device~~ (23) for turning the extraction tool (20) about the tool longitudinal axis ~~are~~ is provided. In the case of such an extraction tool, extraction of the threaded inserts through inspection ports is made possible in a simple and reliable manner by virtue of the fact that at least a section of the extracting tip (28) has the shape of a steep-angle truncated pyramid (28.1).
